
calendar & resevation

Posted by lenaB - 2006/02/25 17:46

Hi Darko,

Are you planning to add calendar and reservation option to your component?

Thanks

wow , that would be great becose the only one who does this is jomres and it's very expensive...
There is a script wich is great for calendar on www.bookingtracker.com but it's not free either...
Please Darko !!! just do it !!! (am killing , I know what great job it is to do a such good component)

Well to help Darko out.. Either pay the man a contribution or find a coder who can do it.. Darko swamps in work already.

This is something I would like also, but I don't dare ask him.. :P

I think that will be easier to integrate it with AK reservations

Hi,
Do you have any idea how to do this with AKRes?
tnx
