
Mortgage calc

Posted by edrad80 - 2007/04/20 10:52

Hi

My mortgage calc is not showing on the website although it is set to YES in admin.

Anyone knows why?

Thanx

Hi edrad80!

As far as I know its only showing when the object is set to sell

please go to line 111 in details.php of the extended template (located in /components/com_esatteagent/gui/templates/extended/) and add the following code where you want to show the link to the mortgage calculator:

```
<?php echo $this->mortgagecalc;?>
```

Great!

It still does work.
