## Menu images missing

Posted by theofilos - 2007/07/03 10:24

---

Hi evereone

does any one know why some menu images in EA are not shown, (clone-image), (gallery-image) , (delete-image)??:dry:

Thanks

Yes, because the code expects to find the images in a folder called gui within the pictures folder, but it's not there. The author has been moving stuff around and gotten the installation a bit screwed up. I've kind of overcome it myself (today) by manually FTPing the required files into the correct places.

Hi,

where are the original images to be found in the unzipped package?

Thanks
