
size images

Posted by steso - 2007/10/27 19:57

Hi excuse for my english.

I have this problem: I uploaded the pictures with mister estate with 640x480. When i go in my site and open the images their size is 480x360. Why? In ME configuration i have 640x480 but in front end the size are 480x360. What I have to change?

If the image size is 640x480 then try:

in ME->Configuration->Gallery tab, you can set the image size to 640x480 and click the checkbox next to it, to restrict proportions

tell us if that worked

bye:)

Maxi
