
Country by default AND disposition of images

Posted by baucher - 2007/10/27 22:03

hi,

i've got 2 questions:

1. is there a way to set a default Country when filling the data for a property? (so i don't have to select my country each time i add a property)
2. By default, i've set a maximum of 8 pictures per property. When i view the images (of any of the properties) (in frontend) i see 3 rows, the 1st with 4 pictures, the 2nd with 2 pictures and the 3rd with 2 pictures. Is that ok? Why don't 2 rows of 4 pictures each? Is that customizable?

thanks! :blink:

The answer to your first question in the following:
(remember this example keeps only one country-- Spain)

step 1)
Edit:yoursite/components/languages/english.php at line 667:

```
// country ISO codes for EA (& MAP24.com support)
DEFINE('_COUNTRY_AF','Afghanistan');
DEFINE('_COUNTRY_AX','Aland Islands');
DEFINE('_COUNTRY_AL','Albania');
## and all the other DEFINE('_COUNTRY' that follow.....delete or uncomment all except the one(s) you want and leave just:
```

```
// country ISO codes for EA (& MAP24.com support)
DEFINE('_COUNTRY_ES','Spain');
```

```
step 2)
Edit:yoursite/components/includes/country.inc.php at line 18:
$countries = array(
"AF" => _COUNTRY_AF,"AL" => _COUNTRY_AL,"DZ" => _COUNTRY_DZ,"AS" =>
## and all the others that follow##
```

```
);
?>
```

replace with:

```
$countries = array(
"ES" => _COUNTRY_ES
);
?>
```

The second question I guess has to do with your template size, thumbnail sizes etc.

cheers

=====

Thanks for your answer!
I'm going to try that and then i post it here
bye

Ok, that worked fine, thanks!

to my 2nd question, it looks different in MS Iexplorer than to Mozilla, doesn't matter

bye bye:)
