
How restrict 2 steps, on Location search options?

Posted by GammX1 - 2007/11/07 10:32

Dear Sir,
First of all, congratulations for this excelent component...

I need to restrict the public Search possibilities avoiding the full object listings when filtering by "Country" and "State"...
(Step 1 and Step 2)

In other words, I need just to allow full object listings by "Town" and "Suburb" on the MisterState front-end... Step 3 and step 4)

I can not get the file where to do it.

Your guide lines to locate where to patch it should very welcome.

Thanks in advance for your answer,

Rgrds,

GammX1
