## Form - E-mail does not work

Posted by dado1977 - 2007/11/12 19:44

---

Here is link:

[http://krkdiving.com/index.php?option=com\\_estateagent&act=object&task=showEO&id=2](http://krkdiving.com/index.php?option=com_estateagent&act=object&task=showEO&id=2)

Everthing is great except e-mail, it is not working. When i full out form i just got message can not send e-mail. what is the problme?

Hi,

I tested the emailform and I've got the message that the email was sent?!

Did I miss something?

pozdrav!

Either this issue was solved, or you didn't enter all fields properly. I filled your form, and the message saying "Mail sent successfully appeared on the top of the page. B)

Hi team.

When I fill the form for a property viewing and click submit, I get "The Email Was Sent Sucessfully.Thank You For Your Visit!", but I never get the email on my mailbox.

I do get other emails generated by Joomla, like the user registration email for example.

Any ideas will be much appreciated.

Thanks,  
Rodrigo

Hello

I have the same Problem.

But i testet the form with different emailaddresses.

If i add a adress with the Sitedomain (example: mail@thisdomainname.at), the email doesn't come to my mailbox.

If i add a adress with an other name (example: mail@otherdomain.at), the email is in my private mailbox.

---

Regards Martin

Also.

Wenn ich in den Kontaktdaten eine Email habe mit dem Hauptsitenamen bsp: email@domainname.at, dann kommt die Email nicht an.

Wenn ich meine Privatadresse angebe bsp.: mail@meineprivateadresse.at, dann geht der Versand des Formulars ohne Probleme von Statten.

Alle anderen Emailfunktionen laufen einwandfrei

MfG

Martin
