
Rooms Search

Posted by horus_68 - 2007/05/13 15:16

I'm wonder how can I change the categories under search, for instance.. room number:
if I want to change the room number field search

```
DEFINE("_EA_SRCH_FOR_ROOMS_1"," 1 ");
DEFINE("_EA_SRCH_FOR_ROOMS_2","min. 2");
DEFINE("_EA_SRCH_FOR_ROOMS_3","min. 3");
```

to be similar like the area field search

```
DEFINE("_EA_SRCH_FOR_DWSPACE_1",< 50");
DEFINE("_EA_SRCH_FOR_DWSPACE_2","40 - 80");
```

so it can find objects with a room number between 4 and 6... how can it be done?

Or using another approach, if I want to add more room numbers to search (lets say a 10 room minimum) where and what do I have to change?

I could even try those two approaches for rooms and bed rooms, so if you can help me in any of them, please do so!

Thanks.

Hi,in first, sorry for my badless english...

pages : Estateagent.php

line 907 :

```
$srm = mosHTML::makeOption( '0', _EA_NO_OPTION );
$srm = mosHTML::makeOption( '1', _EA_SRCH_FOR_ROOMS_1 );
$srm = mosHTML::makeOption( '2', _EA_SRCH_FOR_ROOMS_2 );
$srm = mosHTML::makeOption( '3', _EA_SRCH_FOR_ROOMS_3 );
$srm = mosHTML::makeOption( '4', _EA_SRCH_FOR_ROOMS_4 );
$srm = mosHTML::makeOption( '5', _EA_SRCH_FOR_ROOMS_5 );
$srm = mosHTML::makeOption( '6', _EA_SRCH_FOR_ROOMS_6 );
$srm = mosHTML::makeOption( '7', _EA_SRCH_FOR_ROOMS_7 );
$sp = mosHTML::&lt;&lt;selectList( $srm, 'rooms', 'class="inputbox" size="1"', 'value', 'text', 0 );
```

in relation with you're language file :
for me "french.php" the same i suppose for "english.php"
line 395

```
//-----
DEFINE("_EA_SRCH_FOR_ROOMS_1"," 1 "Â«Â»);
DEFINE("_EA_SRCH_FOR_ROOMS_2","min. 2"Â«Â»);
DEFINE("_EA_SRCH_FOR_ROOMS_3","min. 3"Â«Â»);
```

```
DEFINE("_EA_SRCH_FOR_ROOMS_4","min. 4"«»);
DEFINE("_EA_SRCH_FOR_ROOMS_5","min. 5"«»);
DEFINE("_EA_SRCH_FOR_ROOMS_6","min. 6"«»);
DEFINE("_EA_SRCH_FOR_ROOMS_7","min. 7"«»);
DEFINE("_EA_SRCH_FOR_ROOMS_8","min. 8"«»);
//-----
```

and then modify your structure.

I can't explain how to change the search mode, because I'm looking for it at the moment....if you know where to define the query for search in the database ;)
