
Agents!!

Posted by dlopez - 2007/12/17 18:51

Hello everybody!

I don't speak english! but I need helpness..

I have a problem with the Agents in MisterEstate, I created agents in Contacts Component but this contact is the same to every real state(inmuebles en español) but I need to assign different agents to each real state...

Please if someone know how to do it I'll be so pleased!!

Thank an advance...
