
Number of listing against Category shows (0)

Posted by pickadeal - 2008/01/04 04:23

Hi

I am using Joomla 1.13 and ME 1.1

Normally, the component page displays all the categories and the number of listings within it.

Apartments for Rent (0)

But on my site its displays (0) although I ve put a few properties.

Regards

I had this problem & it took me a long time to figure it out. It seems that Properties (Objects) need to be not only Published but also Verified & then they will be displayed.

Thank you !! You were right. You also have to make sure that the objects are verified.

Regards
