## Adding more fields to category display

Posted by mikiman - 2008/01/13 14:35

---

Hi guys, i've searchd and tryed but cant finf the solution and it seems so simple. I need to put an extra field showing the size of an object. It's not new field but the same one thats shoving on the detail page of an object. I just need to put it to the category view also. To get a picture of what i,m trying take a look at this: link...

This id what i',m done so far. Here is the code that wont work:

```
<td align="right" valign="middle"> <?php echo $obj->homes_size;?> m2</td>
```

pleas help :huh:
