
Jommla 1.5 and Misterestate

Posted by abraxas - 2008/01/22 17:00

hello,

Joomla 1.5 stable is now available! Will have soon a new version of Misterestate?

Thank you very much for your work!

This is a good question...

<http://www.misterestate.com/content/view/69/33/>

Sometimes here in ME responses take long time, so much that seem project is been stopped. Why ?

in my opinion:

I like ME, so if needed I can pay a year fee to be sure on development and to have good assistance

Hello

Do you have any prediction to exit the new version of ME 1.5 Stable?

Thanks

:) :) :) :) :) :) :) :) :) :) :)

Hi all,

please show a little patience. MisterEstate isn't dead, it will continue.

I'm currently looking for new partners. As soon I've found one/them, the new version will be available.

Could you explain us better ?

What's new, release time and so on ...

I think the best thing we can do is get donations in people. If your developing a site for a real estate agency get them to donate.

We did and sent in a 50 euro donation which is peanuts. Real estate agents make big money so do your part to get donations in to help support this project.

Darko, why not put up a donation monitor or something that shows which users have donated to your project.

Hi icsweb,

thank you very much for your donation!

icsweb wrote:

Hi everybody,

Is there any News about the 2.0 version of MisterEstate. I would like to know when the is the releasedate, because I planned launching my website 2 weeks ago, which is runing on Joomla 1.5. I would like to support MisterEstate with a donation but If I dont have a guarentee that I will get a Product(which works fine) I cant waste any money, because I couldnt make a penny with MisterEstate. Dont understand me wrong I really appreciate people like you guys who are

doing software for free. But a small Update of the status of MisterEstate 2.0 would be nice.

i will donate before rhe new version is out!
its even better to help withmoney for the new version, instead of talks like i will do but first i must see

It is easy to say simply donate. But I have never used MisterEstate before. You are most probably a user which used MisterEstate and EstateAgent on Joomla 1.0. I dont know how it is, so obviously I cant just donate. The only think what I know is that this program is the only which might be good. But If I like it(what I guess) I will also support to build new versions. But right now I just see a website which hasnt been updated over a month. What I just like to know is a status information.

I think that if the project was on joomla forge we could put our skills together

Hi admin,

I think that this is not a problem. I'll be too happy to have a very good ME component and too happy knowing you have back money for your efforts.

So I think that is not a problem give you a little feed, or have ME as paid membership, problem is be sure ME is going on strongly and be sure have very good support.

Right now I cannot use ME because I'm using joomla 1.5 and I'm waiting from you news without thinking to others components because I like ME. But right now I really need this component,

Please, Can you update us about ME and joomla 1.5 ?

Many Thanks

Re:Jommla 1.5 and Misterestate

Hi Admin,

i think, that ME is a fine product and i would like to use it with jommla v1.5 - as many others too

So i want to make an offer.

I'm experienced in coding, but don't know the old Mambo-API very well. And with the new framework API i just started. Just for learning the differences, i have started to collect the occurrences of the old "mos"-calls in MisterEstate. This shows me, that there is really a lot of work to be done .

If you think, that i could be a help for your upgrade tasks, just write me a note.

If you would prefer it, to get some donation instead, its ok to me also. Just let me know.

Hi,

is it possible to upload pictures into ME 1.10 with J1.5.x manually and use them in ME, because the Gallery won't work with Joomla 1.5.x atm.

Or does someone have other solutions?

Hope for reply..

Hoods

Re:Jommla 1.5 and Misterestate

Posted by horus_68 - 2008/05/17 17:16

i'm sorry to say this but, as for today, I don't believe that

MisterEstate 2.0 <http://www.misterestate.com/content/view/69/33/> will be published before 3/4 months, or even if it will ever get published.

Why?

- I don't see any attempt from author to tell about roadmap and issues to support Joomla 1.5
- There isn't any Alpha or pre-build version
- There isn't any intent to get help from users: translations, coders, forum moderators, etc.

You couldn't expect that the software just get release on a beautiful morning.

A project with community help couldn't be released this way. Will it go commercial? It would only be possible if the project were from a company with several workers.

Note: I tested the comp long time ago under 1.0 but will only use it under 1.5. There is no point to create a new site with J1.0!

Mister Estate looks a great tool (not only for Property) and there isn't a solution just like ME under GPL. But for now I will have to turn head to other solution.

And don't just respond with "donate money don't argue with author"! I have true respect to authors that work for community, but the 1.5.0 Stable Release was at 21-January-2008 . So 5 months without any clear news on work to be

done?
And 1.5.4 will be out some day soon.

Hope you can find a way to get the project done and get help from users!

Posted by horus_68 - 2008/05/21 05:53

After read this:
<http://www.misterestate.com/content/view/109/9/>
now I have to be silent as ME and J1.5 its on the way!!
:)

Re:Jommla 1.5 and Misterestate

Posted by fredcopies - 2008/07/01 00:46

I don't have to be silent - With no news in 2 months, is this coming or is it dead?

I keep seeing the donate link and will gladly do so but not for a project which gives sketchy feedback and has yet to provide anything of worth towards J1.5 sorry.

Posted by eGulp - 2008/07/04 10:57

Have no replies and updates from admin is Really the bad situations for a so important and used component like MisterEstate is.

What is the problem ?
Money ?
Time ?
Do you want sell/leave the project ?
(sorry for my bad English)

I'm free to talk about all possible solutions directly to the project admin (the owner). (PS You have my private email)
