
how to configure Contact address and mail

Posted by amreshpreetam - 2008/02/03 14:38

Please go through our web site <http://bariradeveloper.com> and see the property link. I am not able to configure email of that contact form and the contact address is empty. please inform how to configure all the above things.

Hi,

please check the following:

1. whois the owner of the properties? (you can see and change it at the ME backend)
2. is there an entry at the contactmanager for this user?
3. is the contactinformation at the contactmanager linked to the users account?
