---

and im sorry Im sure this is already somewhere on the forum, but I have difficulties with this forum it do not work well with any apple browsers and I accidently started new topic :whistle:

so the thing is I got the proportions to work but the thumbnails of vertical pictures are bad quality and too big... if i set up in admin 90px and 90px for the thumbnails they all 90px wide... but the vertical pictures are then much higher and bigger... anyone?

and admin: please feel free to delete this topic, it seems like i cant do it... I found a the "right" topic already..
