---

Hello,

I know this an old prblem but for me the gallery does not work. When I click on the gallery button there is pop up window but the message You don't have permission to access /components/com\_estateagent/includes/gallery/admin.gallery.html.php on this.

Refister Globals are off. Php4-gd is installed and working. Anybody an idea? I really need help. Thnx.

I use Misterestate 1.1.0.

What I have tried so far:

1) RG Emulation 1 -> No access

2) Commented out in authEA.php

```
// 1st security check: check referer host of this script
```

```
// if your server doesn't provide -> $_SERVER
```

```
// please uncomment the following 5 lines.
```

```
// There's a 2nd security check below.
```

```
//$referer = parse_url($_SERVER);
```

```
//$site = parse_url($mosConfig_live_site);
```

```
//if( $action != "preview" && $action != "showMTG" && ($referer != $site) ){
```

```
//die( "Sorry, no access to this source. Please log in!" );
```

```
//}
```
