I am having the same issue. Here is the process i am going through.

Click on Gallery Icon > Click on Bind & Upload > Browse... > Select the image (jpg), Enter Title > Enter Description > Press Upload button

Once the upload button is pressed it will populate the same error. I believe it is an issue with GD. I changed the settings from GD to GD2 and got the same error but nothing the No setting in Config > Gallery. I have GD on my server.

I hope this helps with the troubleshooting.

Thanks,
Reu

Its ok saying that this problem has been mentioned before, where?

I am new to this forum and have just installed the latest version of ME, when trying to upload to the Gallery get a 404 error report. After searching the forum for 404 error, as far as I can see no one has said how to solve this problem.

Can someone please help or point me in the right direction.

This is the error I get when trying to upload to the gallery.

Internal Server Error

The server encountered an internal error or misconfiguration and was unable to complete your request.

Please contact the server administrator, webmaster@a2z.knitting4fun.com and inform them of the time the error occurred, and anything you might have done that may have caused the error.

More information about this error may be available in the server error log.

Additionally, a 404 Not Found error was encountered while trying to use an ErrorDocument to handle the request.
