## The sorting of objects is mixed up at the front.

Posted by paulusb - 2008/02/12 00:49

---

First i want to say this a great compenent.

But only one thing and thats is, that the objects at the front end in catogorie xx mixed up see image.

When a delete this object the problem moves to another object sow its not the object but a file.

Does any one had the solution for this problem. :dry: <http://www.misterestate.com/images/fbfiles/images/objects-7f1eb79f9aa374be609f7abbd6e9edc5.JPG>

Hi,

you´ve added a table to the description, didn´t you?

ME cuts the description text at categories overview page and destroys your table. That´s why you get this "error".

There are 2 solutions:

1. try to play around with the maximum amount of chars for the description text. You can set this parameter at the ME configuration backend.
  2. don´t use tables inside the description text.
