
EA Improved/Estate Agent/Mister Estate

Posted by dlynes - 2008/02/04 07:38

What is the difference between all these versions?

Or is Mister Estate and EA Improved two different products by two different authors? Or is one a fork of the other?

Thanks.

Hi there,

EAIImproved is a fork of EstateAgent, which was the predecessor of MisterEstate. EstateAgent was developed by me, and so ~95% of the sourcecode of EAIImproved is my work.

This greek guy grabed this old code, added a few new functions and now tries to make money with it (with our work!).

An example: if you want the full version (with GoogleMaps support), you will have to pay for it("donate"). MisterEstate has this function too, but you don't have to pay for, because MisterEstate is free and will be free!

So, if you ask me for my opinion:

don't pay for something you can get for free and don't support this kind of impertinent behavior!

If maybe someone told you, that MisterEstate is dead, don't belive him! We are currently busy with development of a complete new MisterEstate version which will be compatible with Joomla 1.5 and will have a lot of new features.

Only show a little patience!

when will this news version will be out?
do you have a demo for me?

the reason: we want to open a portal ...

thank you!
regards
andi

Hi Nuno,

yes, I'm alive, but I hadn't time to answer your emails. I'm very sorry.

This weekend you'll get answers.

First of all,

Great Work to all that develop Mister Estate!

I've discovered this comp last week and its very good!

I was thinking of "trying" to do the port to Joomla 1.5 , but reading the forum I saw that the MisterEstate 1.1 is in dev and will support 1.5.

What is the state of the situation?

I would like to use this comp in a personal project that has nothing to do with real state (Hey, it does all I want :D, just have some minor editing)

When i get some cash, will make a donation, you guys deserve it :)

Hello,
its been a while here,m and lots of changes!!

well guys, if you want to scream EA improved, just update the MisterEstate with the same features, and nobody pay this guy a penny, destroy his business.

Really a pity that there isn't new update of misterestate...We look forward ;)

if useful, i offer some help

Posted by Peet123 - 2008/05/02 13:53

Hi Admin,

i think, that ME is a fine product and i would like to use it with jommla v1.5 - as many others too ;-)

So i want to make an offer.

I'm experienced in coding, but don't know the old Mambo-API very well. And with the new framework API i just started. Just for learning the differences, i have started to collect the occurrences of the old "mos"-calls in MisterEstate. This shows me, that there is really a lot of work to be done ;-).

If you think, that i could be a help for your upgrade tasks, just write me a note

Hallo,
ich habe gerade einige Extensions für Immos etc. abgeklappert... schön das es auch einen "deutschsprachigen" Entwickler

zu geben scheint.

Ich kann mich erinnern schon mal auf dieser Seite gewesen zu sein... JETZT SCHEINT SICH JA ETWAS ZU TUN :-)

Ich muß gestehen, dass ich über das Konkurrenz-Produkt bzw. eine Bemerkung im JoomlaExtensionDirectory zu MisterEstate gefunden habe.

GPL hin oder her... die "feine Englische" ist es auch nicht, wenn nicht einmal ein Hinweis/Link zum 95%tigen Urheber zu finden ist :S

Also, ich hoffe es wird bald ein Update des "Originals" geben :woohoo:

(Medien Integration wie mov,avi,flv und pdf sind ein MUSS im DSL-Zeitalter, bitte bitte... dafür gibt es zum Glück schon zahlreiche BOTs)

Viel Erfolg und fröhliches Codieren.

rk
