
Custom the heading names and less content boxes

Posted by smart10 - 2008/02/18 05:57

How do I change the names of headings eg Description , Location / Vicinity , Condition etc

Can I take away some of these boxes if I do not want them.

How is this done.

Thanks

Hi,
I think you can change field names in the language files.

I need to know were to delete boxes as well

Thanks

All the content is in the language file. components/com_estateagent/languages

About the boxes to delete, are you refering to the checkbox of the extras?

If so you need to edit the file admin.estateagent.html.php

My sugestion is that you coment the code before delete something. This way you can test it, and if all goes ok, then you can delete.

For the frontend you can also edit the file estateagent, but if no field/checkbox is active, it wont show, so no need to edit the files

Thanks I am talking about the property information boxes eg

Object Data,Description,
Location / Vicinity,
Condition, Miscellaneous, Financial Information

I may only want 1 of these boxes to show

Thanks
