
price bug ?

Posted by Roby - 2008/03/07 12:48

No-one know how solve this 'bug', as posted from others in the forum? Im really in troumble with a my client. :(Setting the price from a object 0.00 the system take the price from the previous object in the objectlist.

Try this: when the price is 0.00 it will show "Prijs op aanvraag". That's dutch for "call for price" or something like that.

Good luck.

First backup your estateagent.html.php file

Than in estateagent.html.php (line 311)

goode morning harrie,

do you have any idea what to do to translate it in different languages?

thanks a lot an best regards

carolina

Ciao Carolina, traslare cosa? Prijs op aanvraag ? basta che lo sostituisci con un 'Prezzi in Agenzia' o simili ... ma forse ti riferivi a qualcos'altro?

Many thanks for the reply, but I think I have ask my question in a wrong way. My website is available in 3 languages, and I do not know what to do to have, "Prijs op aanvraag" then in the correct language. do you have an idea?

best regards

carolina

Really i dont know, probably with some "if" and "else",
or you can write all 3 lang : "Prices in agency / Prezzi in Agenzia / Sprjeh tha Agenzia" ...
