## Can't upload new pics to a previously made object

Posted by momolemorback - 2008/03/17 10:42

---

When creating a new listing object i can send as much images as i want. But i can't upload a new picture to a previously created object. The gallery manager windows become then white and nothing happens. I stil can add pics from other objects, but not upload a new pic.

strange isn't it.

If someone has a fix, i'll gladly welcome it!
