
border outside

Posted by uzzu - 2008/03/25 11:48

How can i correct this border so it's inside anyway when i try to insert a new object?
See the following image please

Hi!

This is not a problem of misterestate. This is your editor you are using. Try to edit the settings in your JCE mombot (table width 100% or absolute 400 px)
