
Is possible to set PRICE DESCENDING by default?

Posted by Monacchi - 2008/04/08 11:52

When I see a list of objects I can view this list by PRICE DESCENDING, but I must do this manually, is possible to set this by default?

Regards
Marco

Hi!

To change the default listing you have to alter the code in:

```
../components/com_estateagent/estateagent.php
```

on line 402 you will find this

```
$direction = mosGetParam( $_POST, 'direction', mosGetParam( $_REQUEST, 'direction', 'ASC' ) );
```

Change it to this

```
$direction = mosGetParam( $_POST, 'direction', mosGetParam( $_REQUEST, 'direction', 'DESC' ) );
```

Now the default listing is descending. And as always: Backup your files you're changing ;)

ok but to have by default the PRICE???

Thanks

Must ne somewhere in line 494:

```
$query = "SELECT id, obj_id, type, title, description, rent, price, country, state, town, district, hot"
```

Have no time to test it right now, sorry.

I don't understand how can I do to select by default PRICE...

Thanks

file: estateagent.php

line: 401

```
$ordering = mosGetParam( $_POST, 'ordering', mosGetParam( $_REQUEST, 'ordering', 'price' ) );
```

```
);
```
