
Archived Property

Posted by kemoche - 2008/04/15 23:42

Hi,

Let me commend your good work and great efforts. Am currently working on a property site due for release soon and I was wondering, my site has over 600 properties for sale/ to let (display) and for each we have set a time frame for display hence the property gets archived. Is there a way for the administrator to receive an alert or extract a report on the properties about or already archived for further appraisal! You would agree doing it manually for the 600 properties is something - tedious work! It would be a nice thing to consider a property status reporting plugin in the new version if not considered! Or recommend one that we can work with.

Thanks

kemoche

:woohoo:
