## Module Search. Help me please !

Posted by tegazzini - 2008/05/04 23:13

---

I use Me in italian language.

In the search Module when I use search module step by step by default.

The first step is to choose "Country" (that is Italy),

The 2nd step is to choose "State" (that is Lombardia)

The 3rd step is to choose "Town" (that is Sirmione del Garda)

The 4th step is to choose "District" (that is Brescia)

But in Italy the sequence must to be:

Country -> State -> District -> Town

There is someone who can help me to change php code ?

Thanks. Bye

Claudio
