## Error after Install - estateagent.php

Posted by t17169 - 2008/01/17 20:21

---

I installed Estate Agent. Am using Joomla 1.5 in legacy mode. Created a menu item and when you open, get the following errors:

Warning: Invalid argument supplied for foreach() in  
/home/user/public\_html/components/com\_estateagent/estateagent.php on line 281

Warning: Invalid argument supplied for foreach() in  
/home/user/public\_html/components/com\_estateagent/estateagent.php on line 301

And under Property Database:

Warning: Invalid argument supplied for foreach() in  
/home/user/public\_html/components/com\_estateagent/estateagent.html.php on line 38

Also, in Estate Agent configuration, says configuration.php is not writeable though I changed file permission to 777 in the event that made a difference.

??? Thanks for any help.

achilleThanks for this reply if you have solved how to install Mister Estate in Joomla 1.5

Being a newbie can you explain in more depth what to do.

Thanks
