
ORDER BY display

Posted by looch - 2007/05/10 14:25

I am trying to change the default order by which the properties are displayed: instead of ASCENDING change the order to DESCENDING.

I've been looking through all files but I could not find a solution to this ordering problem.

Please post a fix so that the latest added properties will show first instead of last....

Thank you

if you look in estateagent.php and in your editor look from ASC or DESC.

The code for the sql is ASC for Ascending and DESC for descending

I changed in estateagent.php

row 945 and 275 ASC - DESC. It is ok now. I have first descending.

so did you actually get this work?? I did the same and what it did for me It changed the order of the categories not the order of the objects inside categories.

Please anyone?

edit... i got this working now... I changed this: at line 402... estateagent.php... nothing else...

```
$direction = mosGetParam( $_POST, 'direction', mosGetParam( $_REQUEST, 'direction', 'DESC' ) );
```
