
google map not showing

Posted by magicspon - 2007/12/18 16:41

hello,

my google map is not appearing. i have created an account and i have a api id no. which i have inputted into the relevant field. any ideas why my map wouldn't be showing.

thanks in advance
dave

Hi
same problem. Any solution you got.
showing blank grey screen. uploaded the latest code.
Regards
Sheray

I have some problem, I think this is with areas where google map dont work. Like here in Thailand in this city it will not know a single street by name no matter if I type it with roman or phonetic letters.

I understood that there is a option coming at the next version of ME where you can use longitude and latitude which would be great!

I had also the same problem.
One of the site some body had already put solution.
You can refer to my old post.
