
Gallery Problems

Posted by rider111 - 2008/01/24 17:01

Hi all,
I have a problem with the ME gallery:
When I click over the thumbnail, my thickbox don't have the size that I had signed before on the administrator. I always have a square box after click and a squeeze image.
I try to update the thickbox to the last version on <http://jquery.com/demo/thickbox/> but the problem still remain.
If I change to Lightbox, the Lightbox opening when I click on a thumbnail, but it's all blank...I don't see the image and also I don't see the arrow and the "close" button. And still open like a square and not look like the size that i had signed before.
I saw all the post in this forum and try all, but I don't resolve the problem.
How I can resolve this?
Thank you all for the support

Hi,
don't forget to put the photo size when you upload it ,I had the same pb but when I specify the size it works perfectly ...
