## Add Fields

Posted by baucher - 2007/10/24 17:18

---

Hi, i wish ME 2.0 comes with more fields so i can customize them as i need  
Moreover, i've tried to investigate the code, and didn't find it easy to understand (not impossible), comments would be appreciated when coding.  
great component, i wish i could understand it further (yes, i suppose that depends on me) so i can customize it my own and help other people in the forum.

Thanks!  
Maxi

Hi  
I have managed to add more fields.

However it was a painful process and makes upgrading impossible.

I think it would be a great improvement if there was 20 or so extra fields and a page to rename the display name of the fields.

I would rather pay and be able to edit it from the menu rather than adding more fields myself next time.

Thank you for a awesome component!!!!!!!

So if you have been able to do it, maybe you could write a little tutorial (or guidelines) on how to do that..? please share it here  
thanks,  
Maxi  
;)
