## How remove items from search

Posted by vulcanas - 2007/03/07 19:42

---

Hi all,

I have question:

How to remove or hide "Country" and "States" fields from search page , I need only "City" and "District".  
I'm tried to hide it, but ineffectively, because "search" button not work.

What ideas?

Thanks for help

it isn't possible to hide individual fields from the searchform.

You can enable or disable the whole locationsearch only or customize the script, if you're familiar with HTML,PHP,...

I found solution:

.inputbox of State and Country:

```
.inputbox {  
display : none;  
}
```

estateagent.html.php and estateagent.php

NB! Be very carefull and always do a backUP!!

You can do that in estateagent.html.php file.

Step a)

go to your website EM search page and with right mouse click on page select "view page source"

Step b)

- 1) open file stateagent.html.php
- 2) between 1185 and 1555 line is defined output of search page
- 3) compare code with code in "Step A" mentioned above to realize what you need to change
- 4) remove {class="sectiontableentry1(2)"} with {style="display:none;"} on places you want to hide.  
(or just comment it with <!-- (some original code) -->

I have personally hide some fields by changing:

```
<tr class="sectiontableentry1">
```

to

```
<!-- <tr class="sectiontableentry1"> ORIGINAL -->
<tr style="display:none;">
```

This way you can always remove modifications and get original output back.

!! This is for version 1.1.0 !!

Hope it helped
