
Error in Manage Objects

Posted by sktan7 - 2008/02/04 19:50

After installation of MisterEstate, I tried creating a new object.

There was an error in the program and I could not save any changes.

The msg kept telling me to chose an object type.

I am very sure I did select an object.

The error that appears in IE is as follow:

Line: 70

Char: 115

Error: 'this.tab' is null and not an object

Code: 0

URL: {mysite.com}/administrator/index2.php
