Hello Darko , what about the mod you made to show the latest objects ?
It doesn't seems to work with you new version of EA ?
Am I wrong ?

Hi,

no, you're not wrong. I hadn't the time, to adapt them yet.
I was very busy with EA the last weeks and days.

This weekend I will release a small update with some bugfixes and a new feature and then I must look for a job to get some income before I can think about developing new modules for the EA. :whistle:

kindly regards,

Darko

Thanx Darko !

Maybe you should open a website for renting holidays houses or apartment in english , french and german language, and earn money for those who wants to be on your website.

This works great in france !

I have almost finished to translate your new EA component in french ; when clean I'll send it to you.

Thanx again for your work.
